DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, including claims 2-24, 33- 43, 52-77, 86-105, 113-123 and 164 relates to a transceiver for downconverting, upconverting mixing and amplifying the radio signal.

Species II, including claims 25-31, 44-50, 78- 84, 106-111 and 124-129 relates to a transceiver for calibrating the transmitter and receiver components.

Species III, including claims 167, 169, 170 and 174 relates to a transceiver for programming one of the receiver and the transmitter to compensate for noise or interference.

Species IV, including claims 168, 171, 172 and 173 relates to a transceiver for programming one of the receiver and the transmitter to compensate for process variation or temperature variation.

Species V, including claim 165 relates to a transceiver for programming one of the receiver and the transmitter for selecting a modulation scheme.

Species VI, including claim 166 relates to a transceiver for programming one of the receiver and the transmitter for selecting a data rate.

Art Unit: 2686

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 32, 51, 85 and 112 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
